Keitaro

BACKEND & DATA

Node.js, PHP, PostgreSQL, Prisma,
Supabase, SQL/NoSQL

INTEGRATIONS

REST APIs, Google Auth, AI APIs

NAZAR YANKEVYCH

Front-End Developer · React / Next.js / TypeScript / Shopify

ABOUT ME

Front-End Developer with 3+ years of commercial experience building fast, conversion-focused web products: React/Next.js applications, WordPress sites and Shopify stores. I take work from Figma to pixel-perfect responsive UI, integrate APIs and tracking, and improve Core Web Vitals. A marketing background helps me build interfaces that convert, not just look good.

EXPERIENCE

GoGuru · Front-End / Shopify Developer

Jul 2026 – Present

Full-time · Project: NASS (nasswear.com), fitness e-commerce brand

- Develop the NASS storefront on a custom Shopify Horizon theme: custom Liquid sections, reusable blocks, restyled native sections.
- Build funnel landing pages for paid traffic (prenatal and postpartum programs), including A/B variants and presale pages.
- Set up a development store for testing subscriptions and documented the setup for the team.
- Run the theme workflow with GitHub and Shopify CLI; onboarded a second developer.
- Fixed a live checkout issue caused by a wrong shipping profile and added a shipping check to the launch checklist.

WhiteGen · Front-End Developer

May 2023 – Present

Full-time

- Develop React applications with scalable components and state management (Redux, Zustand).
- Build and launch WordPress blogs, landing pages and WooCommerce stores end-to-end, using Elementor.
- Write custom interactive features and scripts (macros) in vanilla JavaScript.
- Deliver responsive, cross-browser layouts for all device types.
- Improve page load speed, Core Web Vitals and user engagement on key pages.

SKILLS

AI TOOLS

Claude Code, Claude Design

DEV TOOLS & DEPLOYMENT

Git, GitHub, GitLab, Docker, Vite, Postman, hosting & domains (DNS, SSL)

DESIGN

Figma, Canva

COLLABORATION

Basecamp, Bbooster, Notion, Miro, Google Meet, Upwork

PRACTICES

Responsive & cross-browser layout, Core Web Vitals, A/B testing, SEO-friendly markup, Agile

LANGUAGES

Ukrainian — native

Russian — fluent

English — B1

EXPERIENCE

Inno-Soft · Front-End Developer

Oct 2025 – Jan 2026

Contract · HiTech department

- Developed and supported front-end for high-traffic web apps.
- Integrated UIs with Keitaro tracking and third-party APIs.
- Worked in an Agile team with backend, UI/UX, integrators and media buyers.
- Refactored and optimized the codebase; ran A/B tests for conversion.
- Joined architecture discussions, task planning and daily stand-ups.

Veido · Front-End Engineer

Dec 2024 – Feb 2025

Contract

- Built and scaled features for cherrytrader.com in a development team.
- Implemented responsive UI components, fixed cross-browser issues and improved performance.
- Worked closely with UI/UX designers and backend engineers.

LeadAR · Front-End Developer

Jan 2025

Freelance

- Sole front-end developer on a web streaming platform, from layout to launch.
- Built a pixel-perfect responsive UI with clean architecture; optimized playback and user flows.

Annamax · Front-End Developer

Nov 2024

Freelance

- Developed and deployed several production websites for AvtoInstallServis, including localized versions, with SEO-friendly layouts.

EDUCATION & CERTIFICATES

AI Fundamentals — Google

May 2026

Coursera · coursera.org/verify/AOIFOWVMZDH4
